PÁRAMO CCG

WELCOME TO PÁRAMO CCG

(QUICK GUIDE)

Get comfortable and feel the radioactive sand in your lungs. Get ready, because you are about to enter the most hostile world you have ever stepped into.

THE END OF THE WORLD (OR HOW WE GOT HERE)

Imagine a perfect, prosperous, and peaceful world called Vergel. Similar to ours. Boring, right? Well, it didn't last long. The sky suddenly tore apart and The Breach opened, a gigantic portal vomiting fantastic creatures and interdimensional monsters straight out of your worst nightmares.

Our leaders, panic-stricken, pushed the red button. They unleashed a global nuclear hell to try to stop the invaders... You guessed it: it wasn't a good idea. Vergel was reduced to ashes, dry seas, scrap metal, and radiation. Now we call it Páramo, a savage wasteland where only the strongest, the fastest, or the craziest survive.

CHOOSE YOUR CLAN

In this wasteland, going solo means death. You have to choose a side. There are five clans with totally unique playstyles for you to find your favorite:

CLAN	PLAYSTYLE / DESCRIPTION	RESOURCE
ASPHALT	Do you like going full throttle and running over the rival? These motorized nomads live by and for speed. They go in, hit hard, and don't look back.	Gas
GUNPOWDER	If you prefer tactics, control, and holding out until you exhaust your enemy, you will love these militarized engineers. They build bunkers, traps, and heavy artillery.	Metal
SHADOW		Jimsonweed

CLAN	PLAYSTYLE / DESCRIPTION	RESOURCE
	For lovers of dark magic and risk. They are human cultists who channel the energy of The Breach and control aberrations in exchange for sacrifices.	
HORDE	Pure brute force! Orcs, goblins, and beasts now piloting rundown vehicles. Ideal for swarming the board with monsters.	Blood
ABYSS	If you like playing with your rival's mind, these aberrations break the game's logic and disrupt the will of their rivals.	Aether

BASIC RULES

- **The Goal:** You and your opponent have 20 life points. The first to reach 0 bites the dust. Oh! And if you run out of cards in your deck and try to draw, you also lose.
- **Your Deck:** Must have exactly 50 cards of the chosen clan (maximum 3 copies of each card) and 1 Main Boss set aside in its own boss zone. You can also play a maximum of 1 copy of other bosses from your clan and one enclave per deck. Your deck can contain neutral cards.
- Start the game with 5 cards in hand. You may, once, exchange the ones you want for other random cards from your deck.
- The player who starts does not draw a card on their first turn.
- The player who does not start does draw and gets an extra card that gives them an additional resource.

GOODBYE TO RUNNING OUT OF RESOURCES

In Páramo there is an automatic and fluid resource generation system:

> *Each turn, at the beginning, your resource capacity automatically increases by 1, and everything you had spent is recharged. It's that simple. The war escalates turn by turn, get ready to play bigger and bigger cards!*

PLAY ZONES

There are five places your cards can be:

- **Deck:** The 50 cards of your main deck.
- **Boss zone:** Where your deck's main boss resides. You can play it from here and, if it leaves the battlefield, this is where it will return, increasing its cost by 2 resources each time.
- **Hand:** Cards you can play. You will start the game with 5 of them and draw one per turn.
- **Battlefield:** Where most of the cards you play are placed.
- **Pit:** Where cards destroyed on the battlefield go, cards that go straight there after being played, and discarded cards.

WHAT CAN YOU PLAY? (CARD TYPES)

You only have to remember two big families:

- **OBJECTS (They stay on the board):**
  - **Organisms:** Your troops. They cannot attack or tap to activate abilities the turn they enter the battlefield (they have summoning sickness).
  - **Transports:** Cool vehicles. They don't have summoning sickness, but they need your organisms to "crew" them (with their power) to start up and destroy the rival.
  - **Mods:** Weapons or upgrades you attach to your objects by paying their attach cost.
  - **Bosses:** Unique super-powerful cards. You can only have **one of each** on the board! (And in the deck)
  - **Enclaves:** Iconic locations with unique effects. You can only have one **in total** on the board (And in the deck!)
- **EFFECTS (They do their job and then go to the pit):**
  - **Deployments:** Heavy tactics you can only play during your turn's formation phase.
  - **Actions:** Dirty tricks and quick responses you can play at any time, even on the opponent's turn!

THE BATTLE, STEP BY STEP (THE TURN)

The game flows at a breakneck pace. Each turn has 4 simple phases:

1. **FORMATION:** You untap all your tapped objects. You gain 1 maximum resource, recharge your pool to the max, and draw your turn card. Spend your resources! Play organisms, crew transports, attach mods, and prepare your army. You can play any card or ability.
2. **ATTACK:** The best part. You choose who attacks (straight at the rival's life). Only actions and abilities can be played.
3. **BLOCK:** Your opponent decides how to block the attack. Multiple troops can block the same attacker, but one blocker cannot block multiple attackers. Only actions and abilities can be played.
4. **DAMAGE:** Troops taking damage equal to or greater than their defense go straight to the pit! Surviving troops automatically heal their wounds, you discard until you have 7 cards in hand, and pass the turn to the rival. Only actions and abilities can be played.

Ready to survive in the wasteland? Grab your cards, choose your Boss, and show who's in charge in the Páramo!
